# Roadmap

## Table of contents

## 1. Future Plans

The following releases will feature:

- update interface definitions (catch up with new options)
- do some benchmarking to support a better decision between JMagick and im4java
- integration with java buildtools (e.g. ant and maven)
- support of additional commandline tools (suggestions welcome)
- add example programs
- use JMagick/GMagick-JNI as backend (if feaseable)
